

# Thaler Oil Electronic Tank Monitoring

**If you want even more security and peace of mind with your propane delivery, we offer it with electronic tank monitoring through ANOVA Tank Monitors.**

**How it works:** We install a wireless tank monitor on your tank which sends us a readout of your tanks percentage daily. Once your tank is ready we will schedule a delivery.

**Uses:** Anova Tank Monitoring is great for high usage homes, second homes, homes with propane fireplaces, pool heaters, dryers, or cook tops as these are harder to predict usage without an accurate propane tank monitor.

**APP:** With Anova Tank Monitoring not only can we see your tanks percentage, but YOU can as well with the MyTankApp. This App allows you to view your tanks percentage and usage anytime and anyplace. MyTankApp is available on both the Apple and Google Play stores. If you would like to utilize the MyTankApp enter your email address at the bottom of this sheet. Otherwise leave that slot empty. A confirmation email will be sent to you once your monitor is set up with instructions for the MyTankApp.

There will be an annual charge of \$60 for the monitor. Thaler Oil will install your monitor for free.

## NEVER EXPERIENCE A PROPANE GAS RUNOUT WITH A WIRELESS TANK MONITOR.

**If you are interested in Wireless Tank Monitoring please fill out and mail this form below, or if you have any questions contact our office. 715-723-2822**
